Innovation: Building Concreate Pontoons and using precast technology

1. Using precast technology to join together for infinitely long or wide platforms
2. Concreate pontoons can be made in a precast concreate yeard to a very high standard and specification
3. They can be produced in modules that are easy to transport by road
4. They can easity be joined on site using precast technology
5. The side of the platform is infinite
6. No drydock casting
7. No reduction in spec to suit site casting
